

Is she/he

Human?

**8 week embryo
(1st trimester)**

"Science has a very simple conception of man; as soon as he has been conceived, a man is a man."

Jerome Lejeune, M.D., Ph.D.,
former Professor of Fundamental Genetics,
Hôpital des Enfants Malades, Paris, France;
William Allen Memorial Award, Kennedy Prize

"Human embryos and human fetuses are human beings, each with their own unique genetic DNA."

Ralph P. Miech, Associate Professor of Molecular Pharmacology, Emeritus, Brown University

"...the status of the fetus has been elevated to that of a patient who, in large measure, can be given the same meticulous care that obstetricians provide for pregnant woman."

Williams Obstetrics, 20th edition,
F. Gary Cunningham et al.,
Appleton & Lange, 1997, p. 151.

"When fertilization is complete, a unique genetic human entity exists."

C. Christopher Hook, M.D.
Oncologist, Mayo Clinic
Director of Ethics Education,
Mayo Graduate School of Medicine
